

Soldiers,

For all of those that do not have an Anti-Virus program installed on your computer, there is a free copy available to all National Guard soldiers.

You can choose from:

Norton Anti-Virus
McAfee Anti-Virus
Trend Micro Anti-Virus

On Army Knowledge Online -AKO (<http://www.us.army.mil>), under the self-service tab, you will see "Antivirus Service", click this. Once the page loads you will have your choice on the left of the page for one of the mentioned programs above. Just follow the instructions provided.

Note Do not install more than one anti-virus on your computer. If you do your computer will run extremely slow, as both program are competing for the same resources from your computer.

Staff Sergeant James D. Nirenberg
A co 1-124th Infantry Regiment
Florida Army National Guard
